

Hannom

Rotating Engineering

Our Expertise

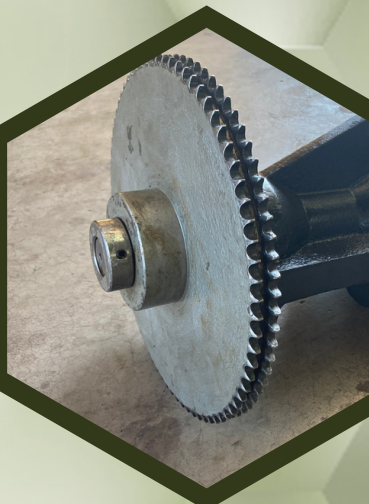

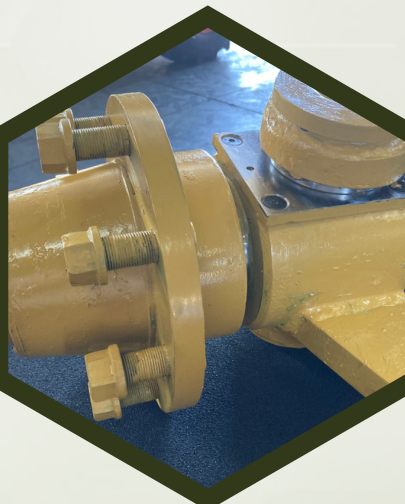

Hannom (Pty) Ltd specialises in turbo/rotating machinery which includes steam turbines, compressors, pumps, gearboxes and all high speed rotating equipment. Our engineering services are supported by specialised machining and fabrication facilities.

We deliver complete turnkey solutions to our clients by providing full project management from concept, design, fabrication, installation and maintenance. Managing all documentation and ensuring quality control.

Engineering Services

Hannom (Pty) Ltd supplies engineering services with qualified mechanical engineers and artisans:

- Mechanical engineering
- Product support and maintenance
- Design and engineering drawings
- Reverse engineering
- Troubleshooting
- Project management
- Manufacturing and assembly
- Quality and document control

Services

Hannom (Pty) Ltd specialises in the following:

Equipment:

- Pumps
- Compressors
- Turbines
- Gearboxes
- Fans/Blowers
- Shafts
- White metal bearings

General:

- Field services
- Equipment inspections
- NDE Inspections
- Positive material identification
- Replication services
- Vibration analysis

Machining:

- Turning
- Milling
- Slotting
- Surface grinding
- Gear cutting
- Line boring
- Laser alignment
- Fabrication welding
- Specialised welding
- HDPE welding
- On-site machining
- Low/high speed balancing
